# GCSS-AF Overview

**U.S. AIR FORCE**

**Lee Lowman**

**AF CIO/A (OSEA-  
IPT)**

**(MITRE FFRDC)**

**11 Mar  
2004**

**Provide a general overview  
of GCSS-AF including an  
operational support  
architecture perspective**

**U.S. AIR FORCE**

---

# **GCSS-AF Vision**

## **GCSS-AF Vision: Provide accurate, timely, trusted information to the Warfighter**

- **Focus on improving Air Force Mission**
- **Consolidate, Integrate, and Operate Central Information Technology Services and Capabilities**
- **Enterprise Benefits**
  - **Increased Operational Readiness**
  - **Decreased Decision Cycle**
  - **Reduced \$/Flying Hour**
  - **...**

**U.S. AIR FORCE**

# **Why GCSS-AF?**

## **■ Kosovo Lessons Learned**

- Legacy systems were not designed for Expeditionary Operations**

**Couldn't accurately match munitions to mission requirements**

**Couldn't match trained personnel to mission needs**

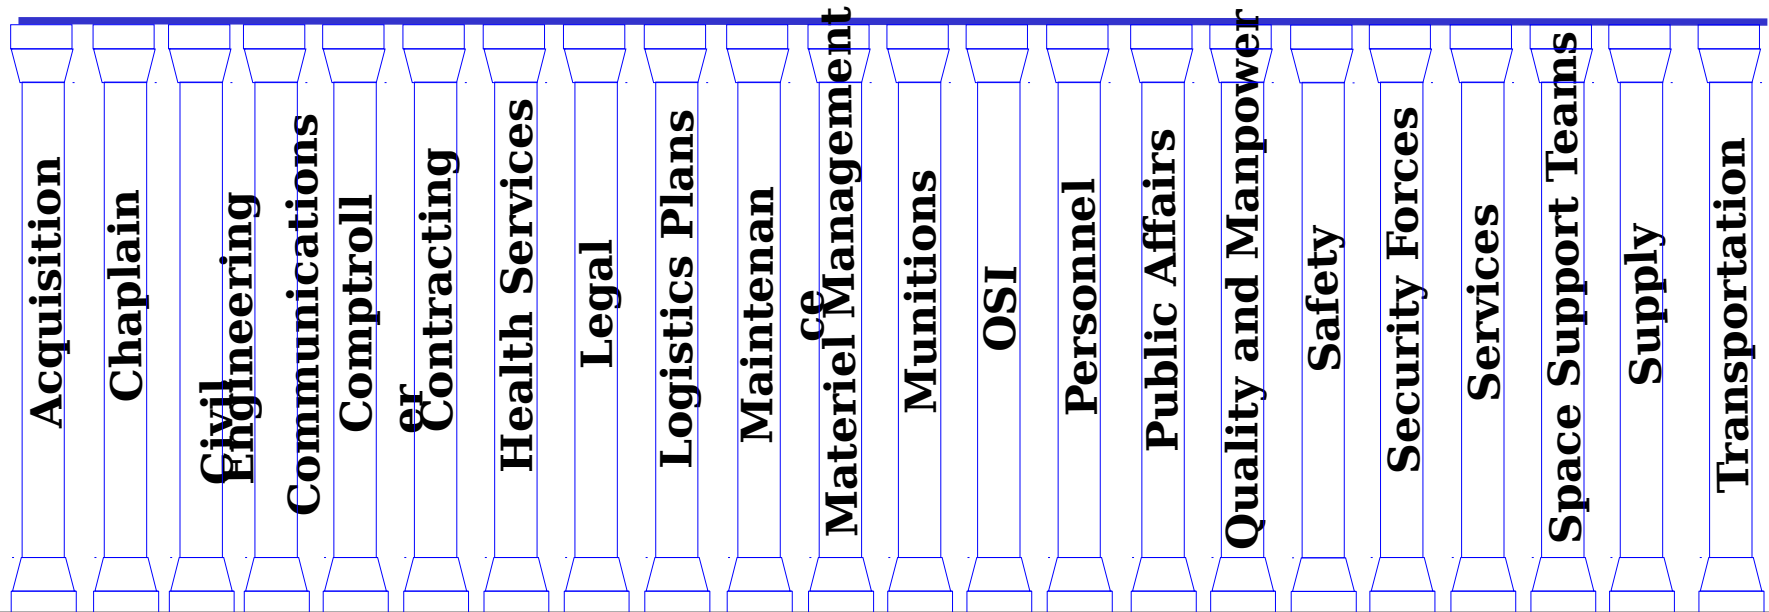

**Couldn't deploy legacy maintenance system - safety of flight maintenance (TCTO) status is unknown**

**No single application has all the required information - We must have the capability to pull cross-functional information**

# ***Business Areas Supported by GCSS-AF***

## **Operational Support**

**640+ Systems**

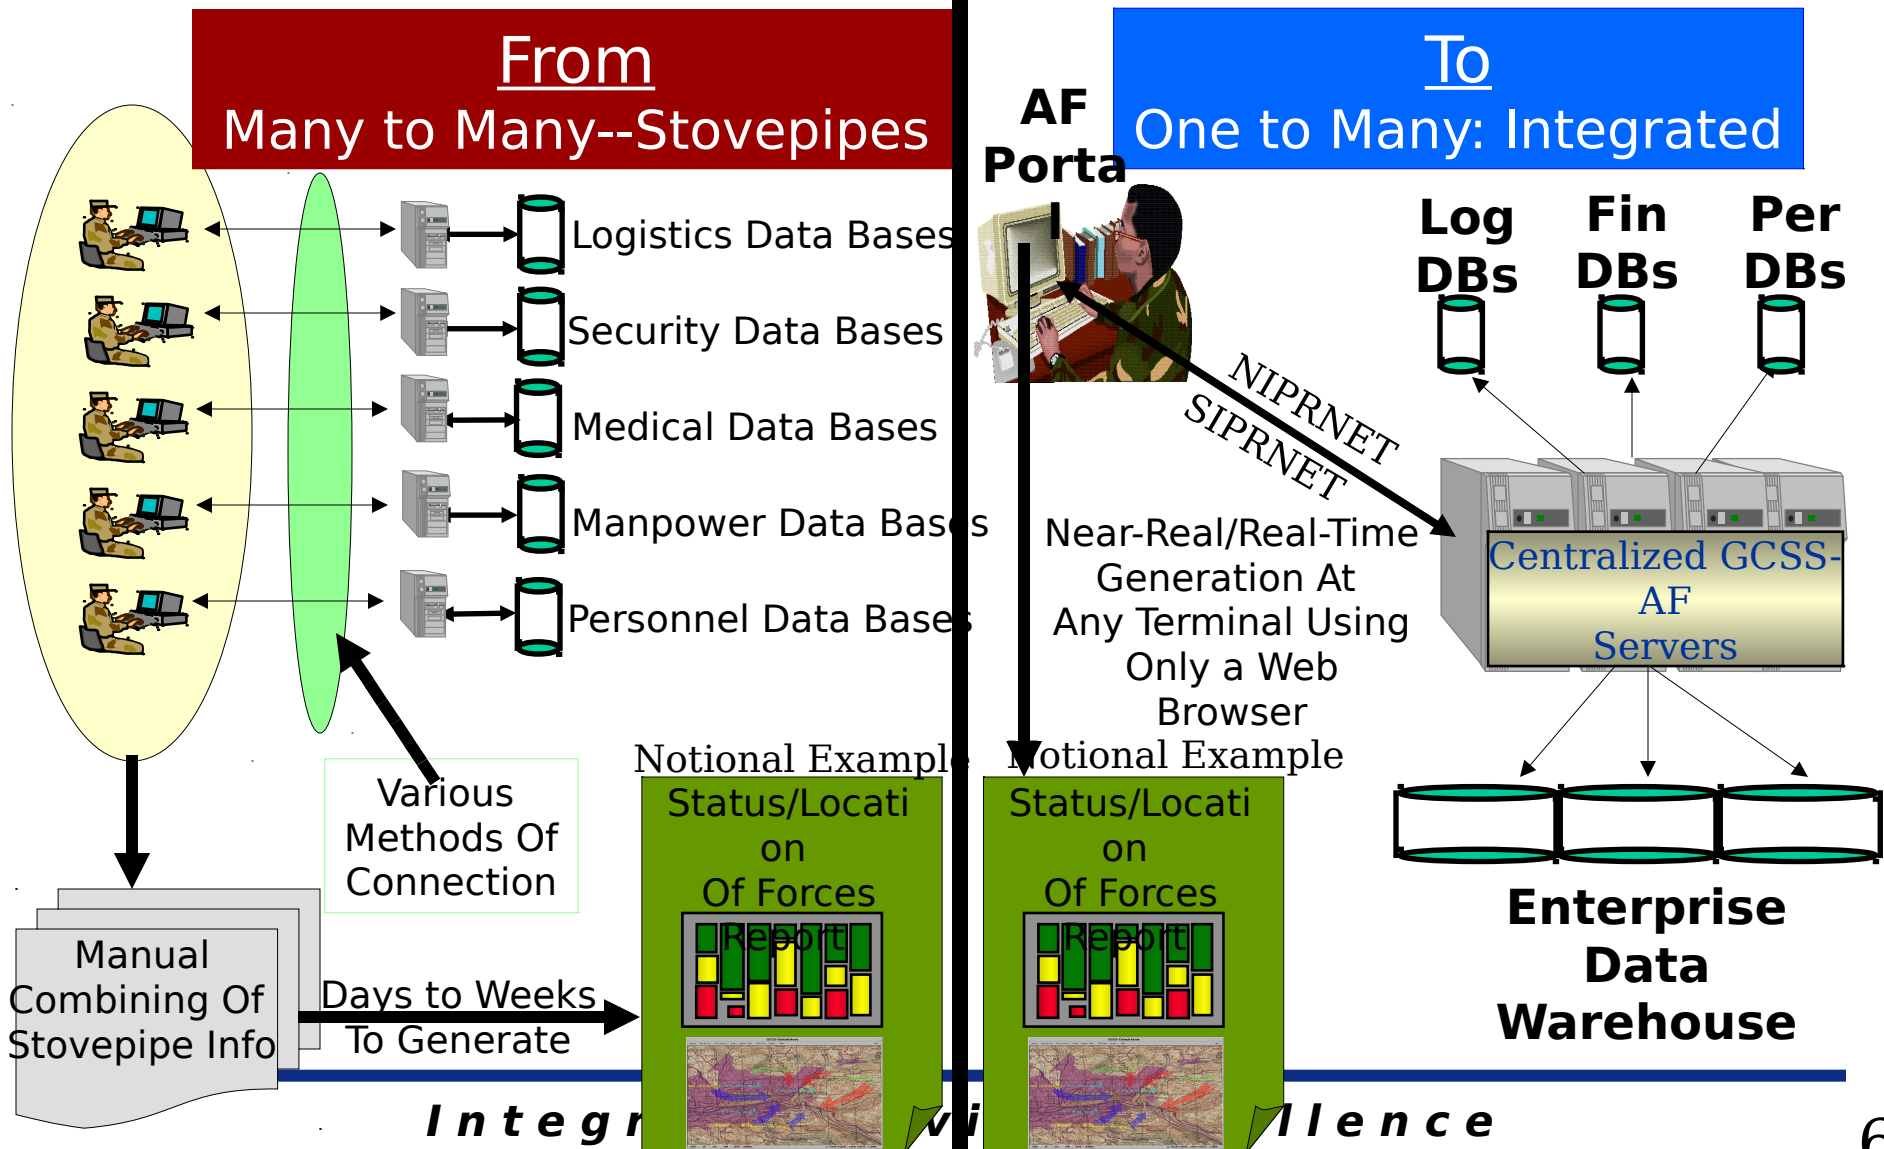

**250+ Locations Worldwide**

**> 20,000 concurrent Warfighters on-line**  
**300,000+ Warfighters/Users Worldwide**

U.S. AIR FORCE

# ***GCSS-AF Enterprise Services Architecture***

**U.S. AIR FORCE**

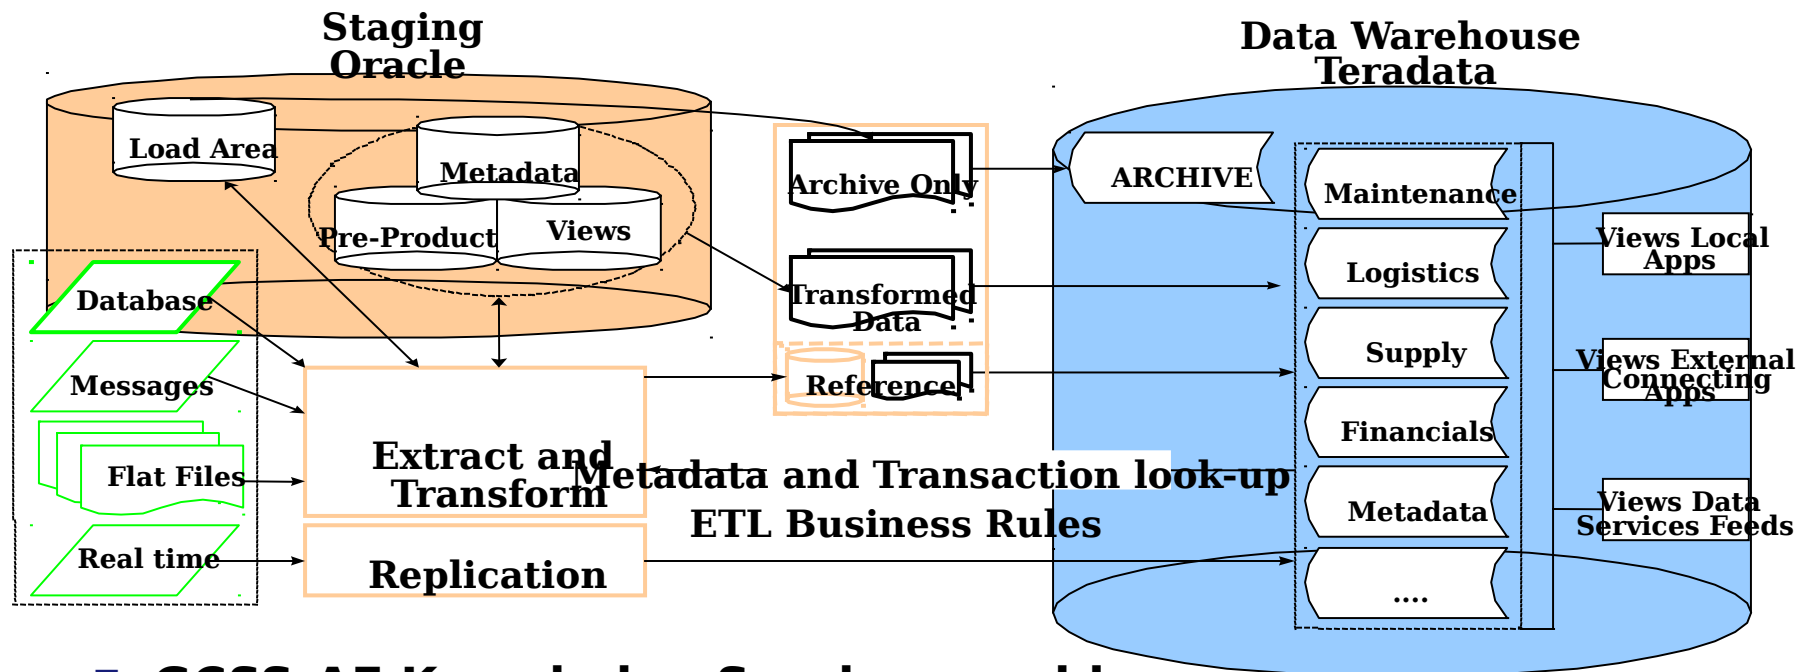

***Integrity Service Excellence***

# GCSS-AF Knowledge Service (EDW)

U.S. AIR FORCE

- **GCSS-AF Knowledge Service provides**
  - Enterprise data store for current state and history
  - Interface consolidation for periodic data flows
  - Data aggregation and fusion into information for analysis
  - Data mining for trends and predictive needs analysis
  - Database and data mart consolidation

# ***Mission Benefits of GCSS-AF***

**U.S. AIR FORCE**

---

- **Commander can disseminate information real-time to all authorized users in command**
- **Every airmen has the full IT power of the Air Force in his hand (browser device) to execute his mission**
- **New capabilities deploy immediately worldwide**
- **Leverages the capabilities of today's web aware airmen**
- **Hierarchical architecture allows mission focus of all implementers**
- **Integration across disciplines to Commander's view**

# ***Fiscal Benefits GCSS-AF***

**U.S. AIR FORCE**

---

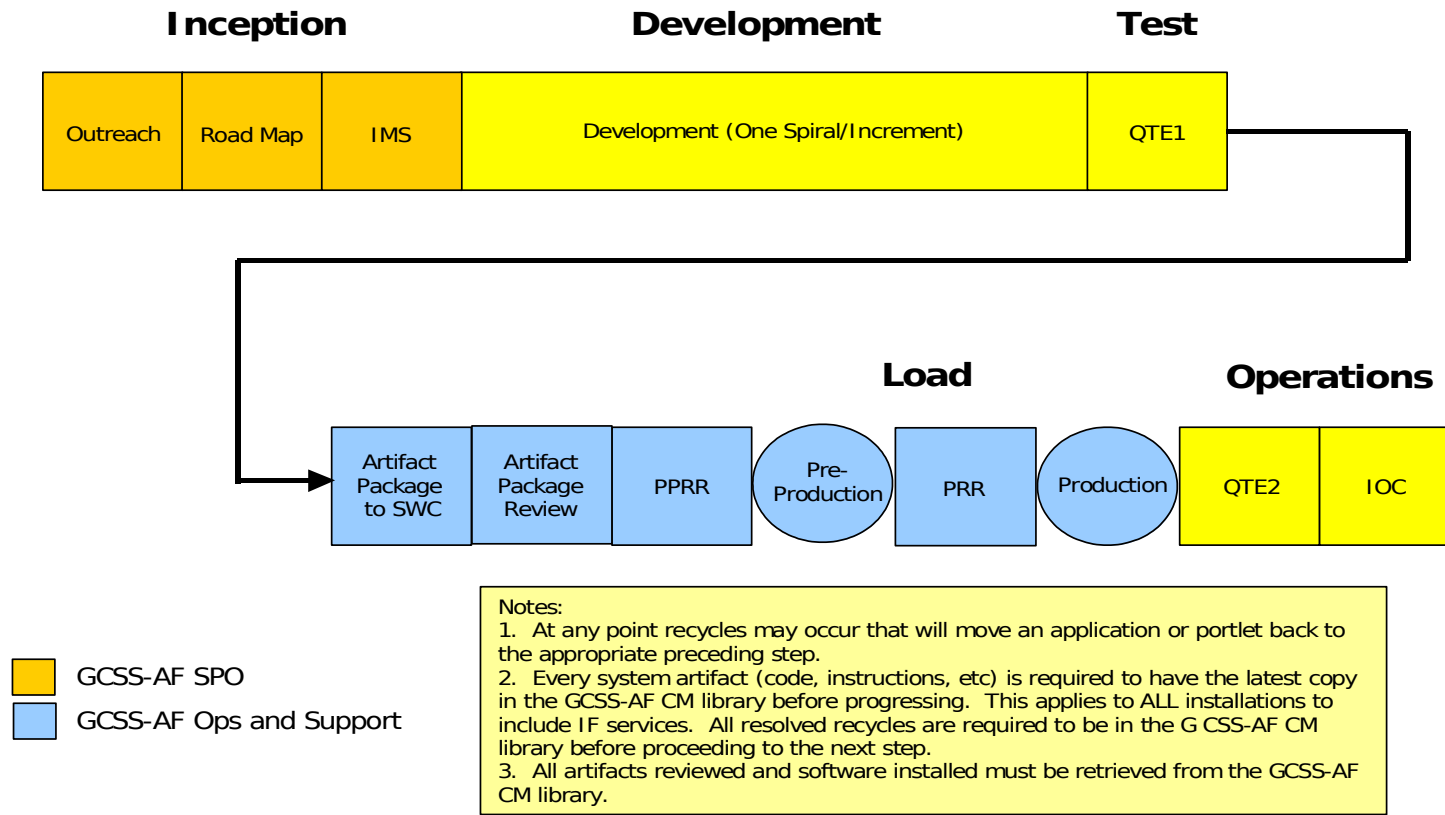

- **Consolidation - Massive Scale Efficiencies**
  - **Web Servers**
  - **Storage**
    - **Data Warehouse and Data Marts**
    - **Databases**
    - **SANS**
  - **Processing**
    - **Better load balancing Air Force resources**
    - **Computing on demand via Commercial lease (I.e. edge servers)**
  - **Support staff**
- **Security - solve once for everyone**
- **Architecture - solve each piece once**
  - **Exploit on NIPRNET and SIPRNET for all IT capabilities**
- **Enterprise Licenses**

# ***Take Aways***

- **GCSS-AF provides the IT mechanism for improving warfighter and operational support**
  - **Infrastructure is now focusing on open discovery, management, optimization, and evolution of existing services/capabilities**
  - **Another focus is on automating mission capabilities across Air Force**
  - **Current push for AF Portal registration/use and domain/community use of the AFKS**
- **AF operational architectures are essential to enable GCSS-AF to continue on its transformational path to provide a user with the right information, at the right time, at the right place, and in the right format**

# ***Summary of GCSS-AF Capabilities***

---

- **Availability: 99.7 percent - about 1 hour of scheduled and unscheduled downtime every 10.5 days**
  - **End-to-end Performance:**
    - **> 90 percent of transactions in less than 5 secs**
    - **> 80 percent of transactions in less than 3 secs**
    - **> 70 percent of application transactions in less than 2 secs**
  - **Users: Average 100K logins/week, approx 40% unique**
  - **Content Demand: 600K to > 1.5M pages per day**
  - **Applications: > 20**
  - **Single Sign On Applications: > 50**
  - **Supply Chain Operational Requirements (SCOR) support for critical portions of Supply, Material Management, Comptroller, Contracting, Personnel, Maintenance, Communications, Transportation via the Storage/Knowledge Service**
-

# ***Open Standards Support***

## Data Standards

- ANSI SQL
- JDBC
- OMG Persistent State Service (PSS)
- OMG Persistent Object Service (POS)
- OAG OAGIS
- EJB Entity Beans (CMP)

## Messaging Standards

- OAG OAGIS (BSR/BOD)
- OAG OAMAS (AMI)
- JMS
- XML (formatting)

## Design Patterns

- Model-View-Controller

## Componentization Standards

- J2EE
- EJB

## Presentation Standards

- Java Servlets
- Java Server Pages (JSP)
- HTML/DHTML/HTTP

## Development Processes

- Rational Unified Process using UML

## Security

- JAAS
- PKI (certificates for authentication)
- HTTPS/SSL (data encryption)
- LDAP

# ***Information Assurance and Security Status***

**U.S. AIR FORCE**

## ■ **Components**

- **Authentication and Authorization (Access Manager)**
- **User and Resource Directories (Active Directory)**
- **Public Key Infrastructure (DoD, Access Manager)**
- **Network Access Points (Cisco Content Services Switch, Bluecoat, Akamai, AppCelera)**
- **Identity Management**
- **Multi Level Security Guards**

**Blue Products Selected**

**Black products current or future focus**

## ■ **Benefits GCSS-AF Security**

- Secure Access
- Distributed Administration
- Centralized Control
- Consolidation efficiencies

## ■ **Standards**

- Java Authorization and Authentication Standard (JAAS)
- Kerberos
- Web Services - Security
- DoD Public Key Infrastructure (PKI)
- Security Access Mark-up Language
- Lightweight Directory Access Protocol

U.S. AIR FORCE

# ***User Assistant Status***

## ■ **Components**

- Portal (BroadVision)
- Knowledge Discovery (Autonomy, Verity)
- Browser (Internet Explorer, Netscape)
- Information Fusion (Numerous Business Intelligence Tools)

## ■ **Benefits GCSS-AF User Assistant**

- Common User Interface
- User customization and personalization

## ■ **Standards**

- XML
- HTML
- HTTP
- DOM
- URI/URL

**Blue Products Selected**

**Black products current or future focus**

**U.S. AIR FORCE**

# ***Collaboration Status***

- **Components**

- **Communities of Interest (Broadvision)**
- **Instant Messaging (Bantu)**
- **Business Process Scripting and Execution**

- **Benefits GCSS-AF Collaboration**

- **Force multiplier**
- **Virtual teaming**
- **Operational Architecture Implementation**

- **Standards**

- **WorkFow Management Coalition (WFMC)**
- **Web Services - Business Process Execution Language (WS-BPEL)**
- **Business Process Modeling Language (BPML)**
- **OAGIS**
- **DoD Discovery Metadata Standard (DDMS)**

**Blue Products Selected**

**Black products current or future focus**

# ***Application Status***

## ■ **Components**

- Application Server (WebSphere, Oracle AS, IIS/ASP)
- Operating System (Solaris, Windows, HP UX)
- WebServer (Apache IIS)
- RAD Framework (Cold Fusion)
- Edge Networking Akamai
- Disaster Recovery Failover

## ■ **Benefits GCSS-AF Application**

- Availability
- Reliability
- Reduced Lifecycle Cost
- Transactional Integrity

## ■ **Standards**

- J2EE
- Microsoft Framework
- POSIX
- HTTP
- HTML
- XA/Open

**Blue Products Selected**

**Black products current or future focus**

# ***Messaging Status***

## ■ **Components**

- Application centric messaging (WebSphere MQ)
- E-Mail

## ■ **Benefits GCSS-AF Messaging**

- Structured Information Flow across the Enterprise
- Flexible user information exchange
- Guaranteed Delivery
- Publish and Subscribe

## ■ **Standards**

- Open Applications Group Interface Specification (OAGIS)
- Java Messaging Service (JMS)
- Web Service - Transport
- ebXML - Transport

**Blue Products Selected**

**Black products current or future focus**

# Mediation Status

## ■ Components

- Extract, Transform, Load (Informatica)
- Enterprise Application Integration (BizTalk)
- Business Intelligence (Business Objects, COGNOS, Oracle Discoverer, Oracle Reports, Brio)
- Alerts (BroadVision, Autonomy)

## ■ Benefits GCSS-AF Mediation

- Common Information Model
- Exposure of Enterprise Information
- Reuse of Enterprise Business Logic

## ■ Standards

- Open Applications Group Interface Specification (OAGIS)
- United States Message Text Format (USMTF)
- ebXML Core Components
- DoD Discovery Metadata Standard (DDMS)
- ebXML Registry Standard
- Universal Description Discovery and Integration (UDDI)
- Web Service - Business Process Execution Language

**Blue Products Selected**

**Black products current or future focus**

# Discovery Status

## ■ Components

- Catalog, Registry, Repository (GoXML)
- Directory (Active Directory)
- Search (Autonomy)
- Content Management System
- Data Management Model

## ■ Benefits GCSS-AF Discovery

- Portfolio Management
- Discovery of Information and Processes
- Operational Architecture Implementation

## ■ Standards

- Open Applications Group Interface Specification (OAGIS)
- DoD Discovery Metadata Standard (DDMS)
- ebXML Registry Standard
- Universal Description, Discovery, and Integration (UDDI)
- Web Service - Business Process Execution Language (WS-BPEL)
- Structured Query Language (SQL)
- Lightweight Directory Access Protocol (LDAP)

**Blue Products Selected**

**Black products current or future focus**

# Storage Status

## ■ Components

- Online Transaction Processing Database (Oracle, SQLServer)
- Data Warehouse (Teradata)
- Storage Area Network (EMC, Hitachi)
- Data replication, caching, and mirroring for multi-site

## ■ Benefits GCSS-AF Storage

- Structured and Unstructured Information Persistence within the Enterprise
- Optimized performance of data stores

## ■ Standards

- SQL
- POSIX
- ODBC
- JDBC
- URI/URL

**Blue Products Selected**

**Black products current or future focus**

## ■ Components

- End to End Performance (AppScope)
- Data Center Performance (TeamQuest)
- Logging (Log4J)
- Storage Management (Oracle, Teradata, EMC)
- Network Management (Tivoli)
- User Management (Tivoli Web Portal Manager)
- WS-Management
- Messaging Management
- Provisioning

Blue Products Selected

Black products current or future focus

## ■ Benefits GCSS-AF ESM

- Proactive Operations and Support
- Statistical Process Control
- Reduced lifecycle cost

## ■ Standards

- Simple Network management Protocol (SNMP)
- WS-Management
- Services Provisioning Markup Language (SPML)

**U.S. AIR FORCE**

# ***Goals of the GCSS-AF Knowledge Services (AFKS)***

---

- 1. Provide central, relatable, trusted, and current analytical data repository for Combat Support and the Business Areas to:**
  - a) Improve decision making capabilities at all levels of the AF**
  - b) Support the Commander in Chief 129 Information Requirements**
- 2. Improve Data Management practices:**
  - a) Reduce the data footprint of transaction systems**
  - b) Reduce analytical database thereby eliminate redundant data exchanges**
  - c) Support forecasting and planning engines**
- 3. Provide data access services to Communities of Interest**

# ***AFKS Implementation Goals***

**U.S. AIR FORCE**

---

- **The goals set by the AF, End-users, and IT community require that data integration activities accomplish the following:**
  - **Cross-Functional Analysis Capabilities (e.g., Finance and Supply)**
  - **Domain Level Analysis Capabilities (e.g., Asset Management)**
  - **Process Level Analysis Capabilities (e.g., Base Supply)**
  - **Support Infrastructure Consolidation (e.g., Reporting for AISs, Tool Databases, and Interfaces)**
  - **Support Process Transformation**
    - Data Quality Analysis
    - Process Auditing
    - Information Flow Auditing
    - CFO Archive
    - ERP Transition

U.S. AIR FORCE

# GCSS-AF Knowledge Services

## Notional Infrastructure and Data Flows

*Integrity Service Excellence*

U.S. AIR FORCE

# GCSS-AF Knowledge Services

## Data Integration (Inbound) and Data Objectives

- Minimizing latency, but accommodating source systems wherever they are in their modernization
- Flat-file, Message Bus, Database links, and Web-services (BizTalk)

GCSS-AF Inbound

- Emphasizing low-cost access through a variety of mechanisms to integrated enterprise data
- Business Objects BI, ODBC/views, and web-services
- Moving toward 'self-service' data integration through web-services

GCSS-AF Outbound

*Integrity Service Excellence*
